Re: United States Steel Corporation
Gary Works
NPDES Permit No. 0000281

Gentlemen:

For samples collected on August 3, 1977 for total river loadings, our analysis indicated an ammonia-N loading of 247877 pounds and a phenol loading of 405.8 pounds.

We have investigated this problem and are unable to establish a definite cause.

Very truly yours,

W. Halden
